@BUILDOFFSITE

#CollaboratingForImpact

- Set up in 2004 as the voice of the industry, BUILD OFFSITE has sought to promote, support and increase the adoption of offsite and pre-manufactured solutions for the built environment.
- Working in collaboration with our members and influencing government and key industry stakeholders, we seek to remove the perceived challenges, facilitate offsite solutions and deliver guidance, resulting in tangible change.
- By 'normalising' Modern Methods of Construction, BUILD OFFSITE enables greater project delivery and strives to remove the perceived challenges to offsite adoption.
